NEET

## KEY INSIGHTS

*Each passing year witnesses a mounting eagerness among graduates to undertake the NEET Entrance Exam, driven by an unwavering ambition to enter the esteemed field of medicine as aspiring doctors.*

*Based on historical data, individuals from Uttar Pradesh, Rajasthan, and Maharashtra have consistently qualified in the Entrance Examination. Hence, there is a potential for growth in the northeastern and northwestern regions, where increased interest and encouragement for participation in this subject should be fostered.*

*After introducing regional languages in the entrance exam, there has been a notable surge in registrations. Therefore, it is recommended to ensure that the exam is made more comprehensible, facilitating easier qualification.*

*There is a lower participation rate among SC and ST communities in entrance exams, highlighting the necessity to encourage and enhance coaching opportunities for them. Additionally, there is a disparity in male participation, resulting in a lower registration and qualification rate in the exams.*
